PROFESSIONAL SUMMARY

Informatics Engineering student at Telkom University Purwokerto with a strong interest in Software Engineering, Web Development, and Artificial Intelligence. Experienced in developing full-stack applications and AI-powered solutions using Go (Golang), Rust, React.js, SQL, and Machine Learning through academic and personal projects. Seeking opportunities to contribute as a Software Engineer while continuously expanding technical expertise and delivering impactful technology solutions.

EDUCATION

Telkom University Purwokerto

2024 – Present

Bachelor of Informatics Engineering

- GPA:** 3.73 / 4.00
- Relevant Coursework:** Object-Oriented Programming (OOP), Data Structures & Algorithms, Web Programming, Software Engineering, Database Systems, Introduction to Artificial Intelligence
- Activities:** Staff Talent Development & Innovation (HMIF), Staff Interest & Talent Development (HMIF), Coordinator of Events, Public Relations, Logistics, Security, and Finance for Various University Programs

PROFESSIONAL EXPERIENCE

Project Lead & Full-Stack Developer (Focus-Guard)

April 2026 – June 2026

Telkom University Purwokerto

- Project Leadership & Development Management:** Led the complete development lifecycle of the Focus-Guard web application, from requirements analysis and system design to implementation and final testing of AI-integrated features.
- AI Integration & Real-Time Detection:** Implemented Computer Vision and face-tracking models to monitor user distractions in real time, incorporating automated pop-up interventions and voice warning systems.
- Data Tracking & Analytics Development:** Designed a distraction monitoring system that records user activity metrics and generates focus-related insights through automated tracking mechanisms.

Data Analyst Project E-Commerce Fashion Store Sales Analysis (LakuBanyak)

May 2026

Ngulik Data

- Utilized SQL queries, aggregation functions, and filtering techniques to analyze e-commerce sales data and generate actionable business insights.
- Evaluated sales performance across product categories, calculated key business metrics, and identified top-performing products through data-driven analysis.
- Leveraged relational database operations, including table joins and data summarization, to support strategic recommendations aimed at improving sales performance.

Solo Project – PurePress

April 2026

Telkom University Purwokerto

- Privacy-First Architecture Development:** Designed and developed a desktop-based image and PDF compression application with a fully offline processing architecture to ensure data privacy and security.
- Backend Performance Optimization:** Built the backend using Go (Golang) to enable efficient file system operations and support high-performance batch processing capabilities.
- Modern User Interface Development:** Developed a React.js and Vite-based user interface featuring a modern glassmorphism design and drag-and-drop functionality for enhanced user experience.

ADDITIONAL INFORMATION

- Certifications:** AI Learning Modules (15 Modules for Youth) – ASEAN Foundation & Google.org, Introduction to Artificial Intelligence – IBM SkillsBuild, Guide to Learn SQL with AI – DQLab, SQL 101: Learn SQL from Scratch – Ngulik Data, Introduction to Financial Literacy – Dicoding Indonesia (Coding Camp Powered by DBS Foundation)
- Achievements:** 2nd Place Winner – PORSEMA Basketball Competition 2025, Representative Athlete – PORSEMA Basketball Competition 2024, Representative Athlete – PORSEMA Basketball Competition 2025
- Technical Skills:** Go (Golang), Rust, JavaScript, React.js, SQL, MySQL, PostgreSQL, SQLite, Web Development, Full-Stack Development, Backend Development, Database Management, Artificial Intelligence, Machine Learning, Computer Vision, Data Analysis, Git, GitHub, Wails v2, REST API Development
- Soft Skills:** Leadership, Project Management, Team Collaboration, Communication, Public Relations, Problem Solving, Critical Thinking, Analytical Thinking, Time Management, Adaptability, Organizational Skills, Stakeholder Management, Financial Planning, Budget Management, Decision Making, Attention to Detail, Event Management, Negotiation, Conflict Resolution, Strategic Communication.
